

Engineered Coatings, Inc.

KECO Signature Coating Products

KECO offers a complete line of advanced Teflon® coating products for most common mold release applications including EPS foam packaging, thermoforming and rotational molding.

The **KECO 100 Series** are advanced Teflon® coatings offering excellent lubrication and non-stick properties for cast, fabricated, and machined rotational molds, and are equally effective on aluminum, steel and stainless steel. These coatings are designed primarily for commercial equipment use and meet most FDA/USDA requirements for food and pharmaceutical applications. Mold release properties range from **slow to fast** with finishes from **matte to high gloss**.

KECO 100P is a two-part composite Teflon® coating and is an excellent release agent for EPS foam packaging and thermoforming tooling.

KECO 600/TR (Textured Release) is a unique textured-composite coating that creates a shot-peened like finish on smooth molds. **KECO 600/TR** combines the toughness of tungsten carbide with the release properties of Teflon® and can be applied to most common mold alloys, including, aluminum, carbon steel, and stainless steel. This exclusive coating technology provides the option of using fabricated sheet metal rotational molds while maintaining the rich look of a textured surface on the finished product. **KECO 600/TR** can be applied to both new and existing rotational molds.

The table below outlines the specific properties of KECO's signature coating products. For more product information, please contact a KECO representative at 317-356-7279.

KECO Signature Coating	Type of Release	Color	Finish
100-203	Medium	Black	Semi-gloss
100-204	Fast	Bright green	High gloss
100-205	Medium	Brown	Matte
100-207	Slow	Green	Matte
600/TR	Textured/Medium	Black/Green	Textured
100P	Fast	Black/Green	Smooth

KECO Engineered Coatings was established in the early 1980's, as a coatings service provider for the aerospace industry. Today, KECO is one of 20 licensed Dupont Teflon® applicators in North America and is a nationally recognized leader in non-stick coating applications for packaging and printing industries. KECO is ISO 9001:2001 and AS9100 certified.
