KECO Coatings: KECO 400

KECO 400 is a metallic ceramic coating with performance characteristics of a dry film lubricant. This coating is formulated for thermal barrier applications. KECO 400 operates in high temperatures when Teflon® and other coatings fail.

**Properties:**

**Corrosion:** Resists most aggressive organic and inorganic solvents

**Heat Resistance:** Up 1200°F

**Example Applications:**
- Glass containers
- Glass container molds
- Turbines engines
- Vanes
- Cases
- Hubs
- Shafts
- Discs
- Spacers
- Tie bolts
- Mufflers
- Exhaust pipes
- Manifolds
- Engine bolts
