KECO Coatings: KECO 400P

KECO 400P is a thermal barrier coating application offering release characteristics as well. KECO 400P offers a thermal barrier characteristic which greatly reduces the amount of heat or cold that is transferred through the substrate while offering a non-stick characteristic allowing pieces to slide easily across the substrate. .

Properties:

Thickness: .002-.004

Corrosion: Resists most aggressive organic and inorganic solvents

Heat Resistance: 500F top coat

Example

Applications:

Glass containers
Glass container molds
Turbines engines
Vaness
Cases
Hubs
Shafts
High Temperature applications
